

## CONTENTS

Foreword .....	xi
Preface .....	xiii
Optimality of “full bang to reduce predicted miss” for some partially observed stochastic control problems .....	1
<i>V.E. Beneš, R.W. Rishel</i>	
On some approximation techniques in nonlinear filtering .....	17
<i>A. Bensoussan</i>	
Applications of Homogenization Theory to the control of flexible structures .....	33
<i>Gilmer L. Blankenship</i>	
Control of Markov chains with long-run average cost criterion .....	57
<i>Vivek S. Borkar</i>	
Automatic study in stochastic control .....	79
<i>J.P. Chancelier, C. Gomez, J.P. Quadrat, A. Sulem</i>	
Some results on Kolmogoroff equations for infinite dimensional stochastic systems .....	87
<i>G. Da Prato</i>	
Hamilton-Jacobi equations with constraints .....	99
<i>I. Capuzzo-Dolcetta</i>	
An approximate minimum principle for a partially observed Markov chain .....	107
<i>Robert J. Elliott</i>	
Generalized solutions in the optimal control of diffusions .....	119
<i>Wendell H. Fleming and Domokos Vermes</i>	
Consistency of maximum likelihood and pseudo-likelihood estimators for Gibbs Distributions .....	129
<i>B. Gidas</i>	

Brownian models of queueing networks with heterogeneous customer populations .....	147
<i>J. Michael Harrison</i>	
Non-linear filtering - the degenerate case .....	187
<i>U.G. Haussmann</i>	
The asymptotic behaviour of the maximum likelihood estimates for a class of diffusion processes .....	205
<i>Kurt Helmes</i>	
The filtering problem for infinite dimensional stochastic processes .....	215
<i>G. Kallianpur and R.L. Karandikar</i>	
Stochastic control under finite-fuel constraints .....	225
<i>Ioannis Karatzas</i>	
Recent advances in the theory of stochastic adaptive control .....	241
<i>P.R. Kumar</i>	
Almost optimal controls for wideband noise driven systems .....	255
<i>Harold J. Kushner</i>	
Asymptotic solutions of bandit problems .....	275
<i>T.L. Lai</i>	
Viscosity solutions of second-order equations, stochastic control and stochastic differential games .....	293
<i>P.-L. Lions and P.E. Souganidis</i>	
On the memory length of the optimal nonlinear filter .....	311
<i>E. Mayer-Wolf, M. Zakai and O. Zeitouni</i>	
Implementation issues for Markov decision processes .....	323
<i>Armand M. Makowski and Adam Shwartz</i>	
Navigating and stopping multi-parameter bandit processes .....	339
<i>Avi Mandelbaum</i>	
Bounded variation control of a damped linear oscillator under random disturbances .....	373
<i>Jose-Luis Menaldi</i>	

The support of the law of a filter in $C^\infty$ topology .....	395
<i>M. Chaleyot-Maurel and D. Michel</i>	
Existence of densities for statistics in the cubic sensor problem .....	409
<i>Daniel Ocone</i>	
Piecewise linear filtering .....	429
<i>E. Pardoux and C. Savona</i>	
Quick simulation of excessive backlogs in networks of queues .....	439
<i>Shyam Parekh and Jean Walrand</i>	
On some perturbation problems in optimal stopping and impulse control .....	473
<i>Maurice Robin</i>	
Optimal control of jump-markov processes and viscosity solutions .....	501
<i>Halil Mete Soner</i>	
An introduction to singular stochastic control .....	513
<i>Steven E. Shreve</i>	
Scheduling, routing, and flow control in stochastic networks .....	529
<i>Shaler Stidham, Jr.</i>	
Product expansions of exponential Lie Series and the discretization of stochastic differential equations .....	563
<i>H.J. Sussmann</i>	
A survey of large time asymptotics of simulated annealing algorithms .....	583
<i>John N. Tsitsiklis</i>	
Stochastic scheduling on parallel processors and minimization of concave functions of completion times .....	601
<i>Richard R. Weber</i>
