

CONTENTS

| | |
|---|-----|
| Foreword | ix |
| Preface | xi |
| Effective Behavior of Two-Phase Flow in Heterogeneous Reservoir | 1 |
| <i>Brahim Amaziane and Alain Bourgeat</i> | |
| The Double Porosity Model for Single Phase Flow in Naturally Fractured Reservoirs | 23 |
| <i>Todd Arbogast</i> | |
| Two-Phase Immiscible Flow in Naturally Fractured Reservoirs | 47 |
| <i>Todd Arbogast, Jim Douglas, Jr. and Juan E. Santos</i> | |
| Reaction-Infiltration Instabilities | 67 |
| <i>J. Chadam and P. Ortoleva</i> | |
| Characteristic Petrov-Galerkin Subdomain Methods for Convection-Diffusion Problems | 77 |
| <i>Helge K. Dahle, Magne S. Espedal and Richard E. Ewing</i> | |
| On the Simulation of Heterogeneous Petroleum Reservoirs | 89 |
| <i>Prabir Daripa, James Glimm, Brent Lindquist, Móhsen Maesumi and Oliver McBryan</i> | |
| A Theory of Tension at a Miscible Displacement Front | 105 |
| <i>H. Ted Davis</i> | |
| A Random Boundary Value Problem Modeling Spatial Variability in Porous Media Flow | 111 |
| <i>Edmund Dikow and Ulrich Hornung</i> | |
| Numerical Simulation of Immiscible Flow in Porous Media Based on Combining the Method of Characteristics with Mixed Finite Element Procedures | 119 |
| <i>Jim Douglas, Jr., and Yuan Yirang</i> | |
| Adaptive Grid-Refinement Techniques for Treating Singularities, Heterogeneities, and Dispersion | 133 |
| <i>Richard E. Ewing</i> | |

| | |
|---|-----|
| An Analytic Model for Change of Type in Three-Phase Flow | 149 |
| <i>Barbara Lee Keyfitz</i> | |
| Viscous Fingering and Probabilistic Simulation | 161 |
| <i>Michael J. King</i> | |
| A Marriage of Geology and Reservoir Engineering | 177 |
| <i>Larry W. Lake</i> | |
| Vortex Methods for Porous Media Flows | 199 |
| <i>E. Meiburg and G.M. Homsy</i> | |
| A Parametric Study of Viscous Fingering in Miscible Displacement by Numerical Simulation | 227 |
| <i>D.E. Moissis, C.A. Miller and M.F. Wheeler</i> | |
| Recent Developments in Hele-Shaw Flow Modeling | 249 |
| <i>Leonard W. Schwartz</i> | |
| Loss of Strict Hyperbolicity of the Buckley-Leverett Equations for Three Phase Flow in a Porous Medium | 263 |
| <i>Michael Shearer</i> | |
