

CONTENTS

Foreword	v
Preface	vii
Sensitivity analysis for selection bias and unmeasured confounding in missing data and causal inference models	1
<i>James M. Robins, Andrea Rotnitzky, and Daniel O. Scharfstein</i>	
Marginal structural models versus structural nested models as tools for causal inference	95
<i>James M. Robins</i>	
Nonparametric locally efficient estimation of the treatment specific survival distribution with right censored data and covariates in observational studies	135
<i>Alan E. Hubbard, Mark J. van der Laan, and James M. Robins</i>	
Estimation of disease rates in small areas: A new mixed model for spatial dependence	179
<i>Brian G. Leroux, Xingye Lei, and Norman Breslow</i>	
Markov chain Monte Carlo methods for clustering in case event and count data in spatial epidemiology	193
<i>Andrew B. Lawson and Allan B. Clark</i>	
A simulation study of the epidemiological impact of air pollution: Diagnostics of the confounding effects for generalized linear models	219
<i>Colin Chen, David P. Chock, and Sandra L. Winkler</i>	
The use of reference priors and Bayes factors in the analysis of clinical trials	237
<i>Dalene Stangl</i>	
Surrogate endpoints in cancer clinical trials	251
<i>Stephen L. George</i>	
List of Participants	273
