Foreword	v
In memory of Professor Thomas P. Branson	vii
Preface	ix

PART I: EXPOSITORY ARTICLES

Overdetermined systems, conformal differential geometry, and the BGG complex.....	1
<i>Andreas Čap</i>	
Generalized Wilczynski invariants for non-linear ordinary differential equations	25
<i>Boris Doubrov</i>	
Notes on projective differential geometry	41
<i>Michael Eastwood</i>	
Ambient metric construction of CR invariant differential operators	61
<i>Kengo Hirachi</i>	
Fine structure for second order superintegrable systems.....	77
<i>Ernie G. Kalnins, Jonathan M. Kress, and Willard Miller, Jr.</i>	
Differential geometry of submanifolds of projective space	105
<i>Joseph M. Landsberg</i>	
Pseudo-groups, moving frames, and differential invariants	127
<i>Peter J. Olver and Juha Pohjanpelto</i>	
Geometry of linear differential systems towards contact geometry of second order	151
<i>Keizo Yamaguchi</i>	

PART II: RESEARCH ARTICLES

On geometric properties of joint invariants of Killing tensors	205
<i>Caroline M. Adlam, Raymond G. McLenaghan, and Roman G. Smirnov</i>	

Hamiltonian curve flows in Lie groups $G \subset U(N)$ and vector NLS, mKdV, sine-Gordon soliton equations	223
<i>Stephen C. Anco</i>	
Conformal Killing spinors and the holonomy problem in Lorentzian geometry – A survey of new results –	251
<i>Helga Baum</i>	
Projective-type differential invariants for curves and their associated PDES of KDV type	265
<i>Gloria Marí Beffa</i>	
Algebraic construction of the quadratic first integrals for a special class of orthogonal separable systems	277
<i>Sergio Benenti</i>	
Geometry of non-regular separation	305
<i>Claudia Chanu</i>	
Higher symmetries of the square of the Laplacian	319
<i>Michael Eastwood and Thomas Leistner</i>	
Metric connections in projective differential geometry	339
<i>Michael Eastwood and Vladimir Matveev</i>	
Exterior differential systems with symmetry	351
<i>Mark E. Fels</i>	
Partially invariant solutions to ideal magnetohydrodynamics	367
<i>Sergey V. Golovin</i>	
Invariant prolongation and detour complexes	383
<i>A. Rod Gover</i>	
Inhomogeneous ambient metrics	403
<i>C. Robin Graham and Kengo Hirachi</i>	
Pfaffian systems of Frobenius type and solvability of generic overdetermined PDE systems	421
<i>Chong-Kyu Han</i>	

Exact and quasi-exact solvability of second order superintegrable quantum systems.....	431
<i>Ernie G. Kalnins, Willard Miller, Jr., and George S. Pogosyan</i>	
A remark on unitary conformal holonomy	445
<i>Felipe Leitner</i>	
Polynomial associative algebras for quantum superintegrable systems with a third order integral of motion.....	461
<i>Ian Marquette</i>	
Separation of variables for systems of first-order partial differential equations and the Dirac equation in two-dimensional manifolds.....	471
<i>Raymond G. McLenaghan and Giovanni Rastelli</i>	
Differential systems associated with tableaux over Lie algebras	497
<i>Emilio Musso and Lorenzo Nicolodi</i>	
Conformal structures with explicit ambient metrics and conformal G_2 holonomy.....	515
<i>Paweł Nurowski</i>	
Deformations of quadratic algebras, the Joseph ideal for classical Lie algebras, and special tensors.....	527
<i>Petr Somberg</i>	
Analogues of the Dolbeault complex and the separation of variables.....	537
<i>Vladimír Souček</i>	
List of workshop participants.....	551
