

## CONTENTS

Foreword .....	ix
Preface .....	xi
Dissipative Mechanisms .....	1
<i>Stuart S. Antman and Reza Malek-Madani</i>	
Does Rank-One Convexity Imply Quasiconvexity? .....	17
<i>J.M. Ball</i>	
Metastable Harmonic Maps .....	33
<i>Haim Brezis</i>	
Bifurcation of Constrained Problems in Thermoelasticity .....	43
<i>M.C. Calderer</i>	
The Compressible Reynolds Lubrication Equation .....	61
<i>Michel Chipot and Mitchell Luskin</i>	
Twinning of Crystals (I) .....	77
<i>Jerry L. Ericksen</i>	
Quasiconvexity and Partial Regularity in the Calculus of Variations .....	95
<i>L.C. Evans</i>	
Introduction to Pattern Selection in Dendritic Solidification .....	103
<i>Nigil Gondenfeld</i>	
Some Results and Conjectures in the Gradient Theory of Phase Transitions .....	135
<i>Morton E. Gurtin</i>	
The Stability and Metastability of Quartz .....	147
<i>R.D. James</i>	
Continuation Theorems for Schrödinger Operators .....	177
<i>Carlos E. Kenig</i>	
Twinning of Crystals (II) .....	185
<i>David Kinderlehrer</i>	

Simulation of Pseudo-Elastic Behaviour in a System of Rubber Balloons .....	213
<i>Wolfgang Kitsche, Ingu Müller and Peter Strehlow</i>	
Asymptotic Problems in Distributed Systems .....	241
<i>J.-L. Lions</i>	
Stability of Nonlinear Waves .....	259
<i>Tai-Ping Liu</i>	
The Nash-Moser Technique for an Inverse Problem in Potential Theory Related to Geodesy .....	269
<i>C. Maderna, C. Pagani, and S. Salsa</i>	
Variational Stability and Relaxed Dirichlet Problems .....	277
<i>Umberto Mosco</i>	
A Contribution to the Description of Natural States for Elastic Crystalline Solids .....	295
<i>Mario Pitteri</i>	
Nonlocal Problems in Electromagnetism .....	311
<i>Robert C. Rogers</i>	
Hyperbolic Aspects in the Theory of the Porous Medium Equation .....	325
<i>Juan Vazquez</i>	
Green's Formulas for Linearized Problems with Live Loads .....	343
<i>Giorgio Vergara-Caffarelli</i>	
Some Aspects of Adiabatic Shear Bands .....	353
<i>T.W. Wright</i>	
Information About Other Volumes in this Program .....	373
