

CONTENTS

Foreword	ix
Preface	xi
On the interaction of conormal waves for semilinear wave equations	1
<i>Antônio Sá Barreto</i>	
Regularity of nonlinear waves associated with a cusp	9
<i>Michael Beals</i>	
Evolution of a punctual singularity in an Eulerian flow	29
<i>Jean Yves Chemin</i>	
Water waves, Hamiltonian systems and Cauchy integrals	37
<i>Walter Craig</i>	
Infinite gain of regularity for dispersive evolution equations	47
<i>W. Craig, T. Kappeler and W. Strauss</i>	
On the fully non-linear Cauchy problem with small data. II.	51
<i>Lars Hörmander</i>	
Interacting weakly nonlinear hyperbolic and dispersive waves	83
<i>John K. Hunter</i>	
Nonlinear resonance can create dense oscillations	113
<i>Jean-Luc Joly and Jeffrey Rauch</i>	
Lower bounds of the life-span of small classical solutions for nonlinear wave equations	125
<i>Li Ta-Tsien (Li Da-Qian)</i>	
Propagation of stronger singularities of solutions to semilinear wave equations	137
<i>Liu Linqi</i>	
Conormality, cusps and non-linear interaction	155
<i>Richard B. Melrose</i>	

Quasimodes for the Laplace operator and glancing hypersurfaces	167
<i>Georgi S. Popov</i>	
A decay estimate for the three-dimensional inhomogeneous Klein-Gordon equation and global existence for nonlinear equations	179
<i>Thomas C. Sideris</i>	
Interaction of singularities and propagation into shadow regions in semilinear boundary problems	185
<i>Mark Williams</i>
