

## CONTENTS

Foreword .....	xi
Preface .....	xiii

### SEMICONDUCTORS, PART II

#### Device Modeling

On the Child-Langmuir law for semiconductors .....	1
<i>N. Ben Abdallah and P. Degond</i>	
A critical review of the fundamental semiconductor equations .....	19
<i>G. Baccarani, F. Odeh, A. Gnudi and D. Ventura</i>	
Physics for device simulations and its verification by measurements .....	33
<i>Herbert S. Bennett and Jeremiah R. Lowney</i>	
An industrial perspective on semiconductor technology modeling .....	75
<i>Peter A. Blakey and Thomas E. Zirkle</i>	
Combined device-circuit simulation for advanced semiconductor devices .....	89
<i>J.F. Bürgler, H. Dettmer, C. Riccobene, W.M. Coughran, Jr., and W. Fichtner</i>	
Methods of the kinetic theory of gases relevant to the kinetic models for semiconductors .....	109
<i>Carlo Cercignani</i>	
Shock waves in the hydrodynamic model for semiconductor devices .....	123
<i>Carl L. Gardner</i>	
Macroscopic and microscopic approach for the simulation of short devices .....	135
<i>A. Gnudi, D. Ventura, G. Baccarani and F. Odeh</i>	
Derivation of the high field semiconductor equations .....	159
<i>P.S. Hagan, R.W. Cox and B.A. Wagner</i>	
Energy models for one-carrier transport in semiconductor devices .....	185
<i>Joseph W. Jerome and Chi-Wang Shu</i>	

Some applications of asymptotic methods in semiconductor device modeling .....	209
<i>Leonid V. Kalachev</i>	
Discretization of three dimensional drift-diffusion equations by numerically stable finite elements .....	223
<i>Thomas Kerkhoven</i>	
Mathematical modeling of quantum wires in periodic heterojunction structures .....	237
<i>Thomas Kerkhoven</i>	
Numerical simulation of MOS transistors .....	255
<i>Erasmus Langer</i>	
Scattering theory of high frequency quantum transport .....	281
<i>H.C. Liu</i>	
Accelerating dynamic iteration methods with application to semiconductor device simulation .....	287
<i>Andrew Lumsdaine and Jacob K. White</i>	
Boundary value problems in semiconductors for the stationary Vlasov-Maxwell-Boltzmann equations .....	303
<i>F. Poupaud</i>	
On the treatment of the collision operator for hydrodynamic models .....	321
<i>Luis G. Reyna and Andrés Saúl</i>	
Adaptive methods for the solution of the Wigner-Poisson system .....	333
<i>Christian Ringhofer</i>	
The derivation of analytic device models by asymptotic methods .....	343
<i>Christian Schmeiser and Andreas Unterreiter</i>	
Symmetric forms of energy - momentum transport models .....	365
<i>Michael Sever</i>	
Analysis of the Gunn effect .....	377
<i>H. Steinrück and P. Szmolyan</i>	
Some examples of singular perturbation problems in Device Modeling .....	389
<i>Michael J. Ward, Luis Reyna and F. Odeh</i>
