

CONTENTS

| | |
|-------------------------------------------------------------------------------------|-----|
| Foreword | v |
| Preface | vii |
| Scaling limit for the incipient spanning clusters | 1 |
| <i>Michael Aizenman</i> | |
| Bounded and unbounded level lines in two-dimensional random fields | 25 |
| <i>Kenneth S. Alexander</i> | |
| Transversely isotropic poroelasticity arising from thin isotropic layers | 37 |
| <i>James G. Berryman</i> | |
| Bounds on the effective elastic properties of martensitic polycrystals | 51 |
| <i>Oscar P. Bruno and Fernando Reitich</i> | |
| Statistical models for fracture | 63 |
| <i>Lucilla de Arcangelis</i> | |
| Normal and anomalous diffusions in random flows | 81 |
| <i>Albert Fannjiang</i> | |
| Calculating the mechanical properties of materials from interatomic forces | 101 |
| <i>Roger Haydock</i> | |
| Granular media: some new results | 109 |
| <i>H.J. Herrmann</i> | |
| Elastic freedom in cellular solids and composite materials | 129 |
| <i>Roderic Lakes</i> | |
| Weakly nonlinear conductivity and flicker noise near percolation | 155 |
| <i>Ohad Levy</i> | |

| | |
|-------------------------------------------------------------------------------------------------|-----|
| Fine properties of solutions to conductivity equations with applications to composites | 179 |
| <i>V. Nesi</i> | |
| Composite sensors and actuators | 209 |
| <i>Robert E. Newnham</i> | |
| Bounding the effective yield behavior of mixtures | 213 |
| <i>Tamara Olson</i> | |
| Upper bounds on electrorheological properties | 223 |
| <i>Ping Sheng and Hongru Ma</i> | |
| On spatiotemporal patterns in composite reactive media | 231 |
| <i>S. Shvartsman, A.K. Bangia, M. Bär, and I.G. Kevrekidis</i> | |
| Equilibrium shapes of islands in epitaxially strained solid films | 255 |
| <i>Brian J. Spencer and J. Tersoff</i> | |
| Numerical simulation of the effective elastic properties of a class of cell materials | 271 |
| <i>Pierre Suquet and Hervé Moulinec</i> | |
