

Second Abel Conference

A Mathematical Celebration of JOHN MILNOR

Jan 30–Feb 1, 2012

SPEAKERS

Mark Behrens

Massachusetts Institute of Technology

John Fornaess

University of Michigan

Peter Kronheimer

Harvard University

Ib Madsen

University of Copenhagen

Fabien Morel

Ludwig-Maximilians-Universität München

Peter Ozsvath

Massachusetts Institute of Technology

Parimala Raman

Emory University

Douglas Ravenel

University of Rochester

Gang Tian

Princeton University

Ulrike Tillmann

University of Oxford

ORGANIZING COMMITTEE

Alejandro Adem

University of British Columbia

Geir Ellingsrud

University of Oslo

Michael Hopkins

Harvard University

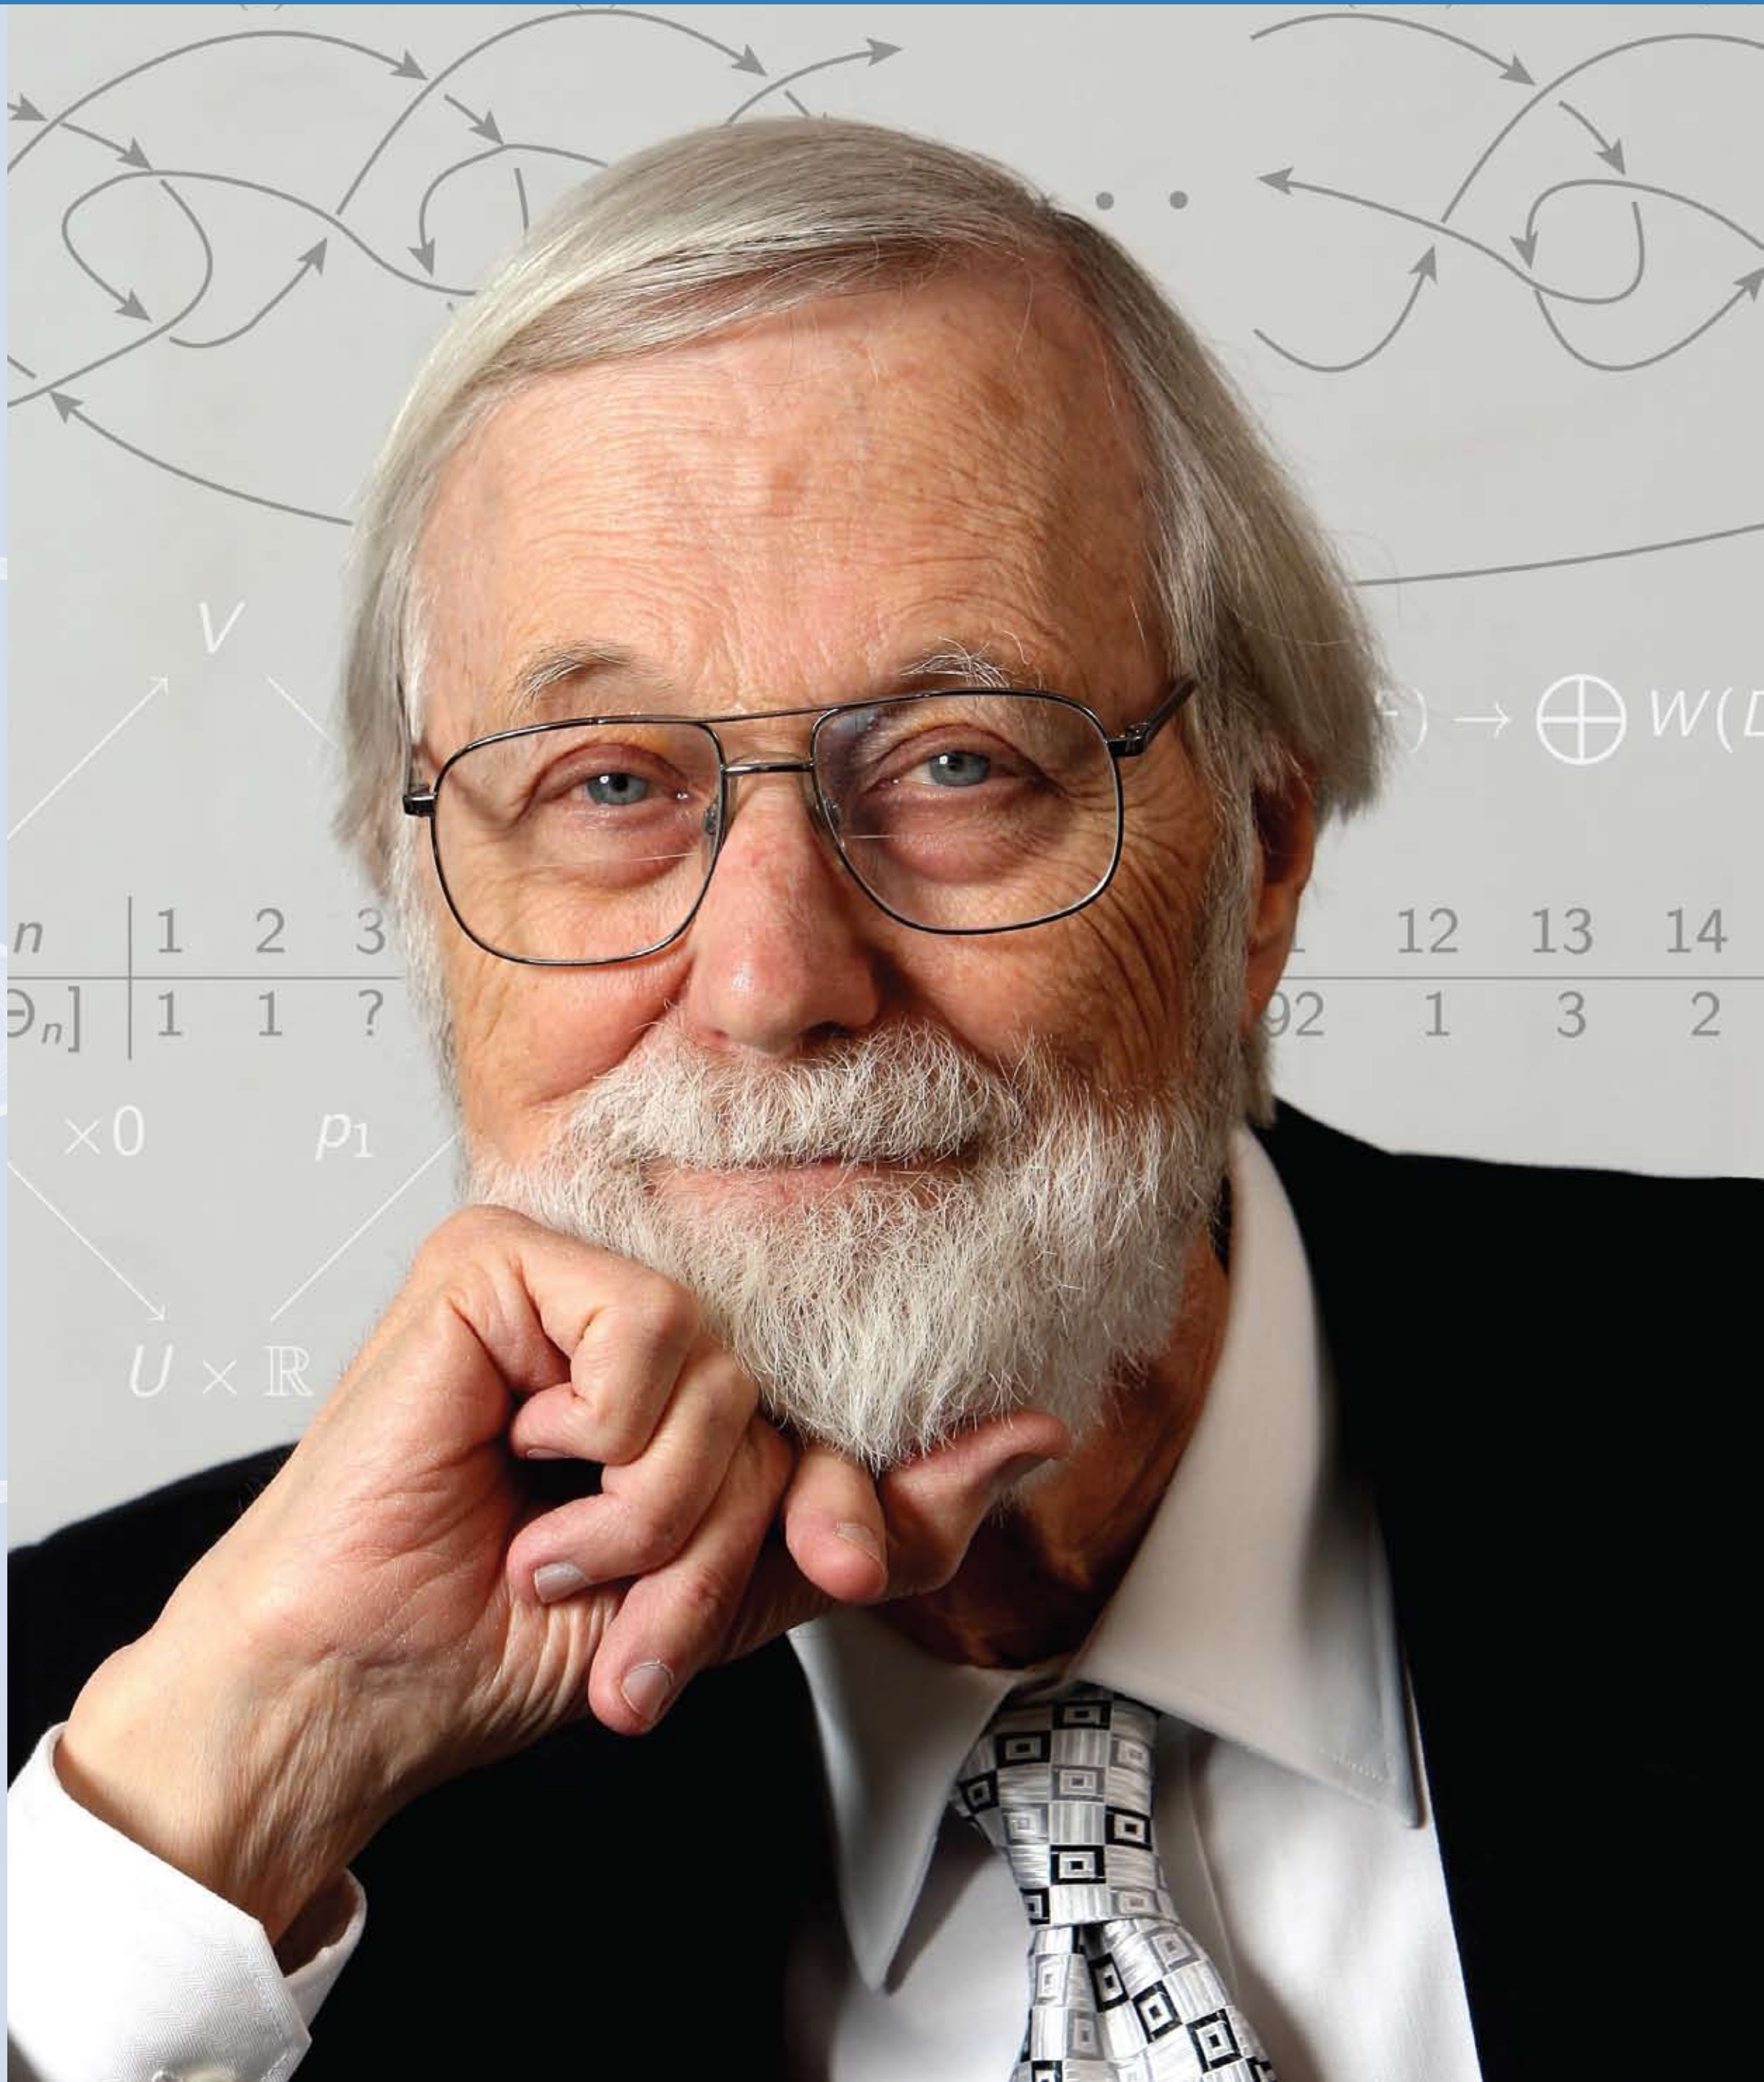

Robion Kirby

University of California-Berkeley

James Stasheff

University of Pennsylvania

The IMA's Annual Abel Conference Series, held in honor and celebration of the Abel Prize Laureates, is a collaboration between the Norwegian Academy of Science and Letters and the IMA. Topics focus on the important mathematical areas impacted by the laureates, and when appropriate, on the work's impact on applications. In 2012, John Milnor will be recognized for his pioneering discoveries in topology, geometry, and algebra.

The IMA gratefully acknowledges the generous support for this conference by IBM Research and the University of Minnesota.
