Sixth Abel Conference
Celebrating the Mathematical Impact of
ROBERT P. LANGLANDS

Nov. 14-16, 2018

SPEAKERS
Salim Ali Altuğ
Boston University
James Arthur
University of Toronto
Ngô Bào Châu
University of Chicago
Matthew Emerton
University of Chicago
Edward Frenkel
University of California, Berkeley
Michael Harris
Columbia University
Tasho Kaletha
University of Michigan
Sophie Morel
Princeton University
Eric Opdam
University of Amsterdam
Peter Sarnak
Princeton University and Institute for Advanced Study
Freydoon Shahidi
Purdue University

ORGANIZING COMMITTEE
James Arthur
University of Toronto
William Casselman
University of British Columbia
Geir Ellingsrud
University of Oslo
Freydoon Shahidi
Purdue University

The IMA's Annual Abel Conference Series, held in honor and celebration of the Abel Prize Laureates, is a collaboration between the Norwegian Academy of Science and Letters and the IMA. Topics focus on the important mathematical areas impacted by the laureates, and when appropriate, on the work's impact on applications. In 2018, Robert P. Langlands was awarded for his visionary program connecting representation theory to number theory.

The IMA gratefully acknowledges the generous support for this conference by the University of Minnesota College of Science and Engineering.
