

AN IMA / MATH ALLIANCE VIRTUAL WORKSHOP

CAREER PATHS IN THE MATHEMATICAL SCIENCES

The Mathematics of a Just and Fair Society

JUNE 2-4, 2021

The Math Alliance is a national community of faculty mentors in the mathematical sciences working together to increase the representation of minority students and professionals in quantitative fields at all levels. The rapidly changing landscape in these fields makes it critical that our mentors and their students have the most up-to-date information concerning opportunities for graduate training and future career opportunities.

This workshop will bring together 60 participants in the Alliance's F-GAP program and their mentors with leaders in applied mathematics and statistics, data science, and economics and management.

Sessions will be taped and made available to all Alliance students and their mentors as well as to the broader mathematical sciences community.

PLENARY LECTURES

PANEL DISCUSSIONS
